

POWERTWISTER

YOUR SWITCH TO EASIER WORK.

We have designed our environmentally-friendly Powertwister drum dispenser especially for you: With minimal effort, you can reel out, transport or move drums with cables, tubes, ropes, chains, hoses or wires.

The Powertwister is extremely robust, durable and can be used to suit your individual needs: Unrolling the cable from the drum is child's play. It is also easy to store as it doesn't take up much space.

You can use the Powertwister quickly and conveniently. As a faithful companion, it is easy to operate and therefore saves you time and staffing costs when you need to reel the cable out. The same goes for expensive storage costs after use. The familiar damage to the drum equipment caused by fork arms etc., which often occurs in practice, becomes a thing of the past.

YOUR ADVANTAGES AT A GLANCE:

- + Speedy recoup of the acquisition costs,
- + Flexible and personalised application options,
- + Easy to handle,
- + Easy to operate,
- + Labour-saving,
- + Robust and durable,
- + Space-saving,
- + No storage costs,
- + CAN BE USED Internationally,
- + Reeling the cable out is considerably easier and more convenient,
- + Damage to the drum equipment caused by fork arms etc. is prevented

The Powertwister is an innovative product with the "MADE IN GERMANY" stamp. How you benefit: You recoup your acquisition costs after a very short time!

The Powertwister is supplied in a robust plastic transport case with multilingual digital operating instructions. You can choose different versions, designed for different drum sizes and drum weights.
